Technical Specifications

GALA S0

OFFICE / OFFICE CHAIRS

In managerial chairs, the product will consist of a net backrest manufactured by plastic injection and a seat manufactured by polyurethane injection on plastic injection. The nets used in the products with a net backrest will be manufactured from a special material with a special netting technique. Managerial chairs will have a synchronous mechanism and allow for seat depth adjustment, seat height adjustment and personal backrest flexibility adjustment. Headrest and lumbar support will be standard, and 2D armrests will be optional. In general, the specifications of the products will be as follows;

GALA S0 71 SWC

The chair will have a net backrest (Dark Gray, Red, Green, Black Net Colors), an upholstered seat, armrests (Standard: black and white; 2D Armrests: black), a star leg (Black Plastic, White Plastic, Aluminum Polishing Star Legs), Synchronous Mechanism (Black, White), Gas Column (Black, White, Chromium Plated).

GALA S0 72 SWC

The chair will have a net backrest (Dark Gray, Red, Green, Black Net Colors), an upholstered seat, armrests (Standard: black and white; 2D Armrests: black), a star leg (Black Plastic, White Plastic, Aluminum Polishing Star Legs), Synchronous Mechanism (Black, White), Gas Column (Black, White, Chromium Plated) and Lumbar Support.

GALA S0 73 SWC

The chair will have a net backrest (Dark Gray, Red, Green, Black Net Colors), an upholstered seat, armrests (Standard: black and white; 2D Armrests: black), a star leg (Black Plastic, White Plastic, Aluminum Polishing Star Legs), Synchronous Mechanism (Black, White), Gas Column (Black, White, Chromium Plated) Lumbar Support (Black) and Headrest (Black).

In operator chairs, the product will consist of a net backrest manufactured by plastic injection and a seat manufactured by polyurethane injection on plywood.

The nets used in the products with a net backrest will be manufactured from a special material with a special netting technique. Operator chairs will have a permanent contact mechanism and allow for seat height adjustment.

GALA S0 30K

The chair will have a net backrest (Black Net), an upholstered seat, armrests (Standard: black and white), a star leg (Black Plastic, White Plastic, Aluminum Polishing Star Legs), Permanent contact mechanism (Black, White), Gas Column (Black, White, Chromium Plated).

In visitor chairs, the product will consist of a net backrest manufactured by plastic injection and a seat manufactured by polyurethane injection on plywood.

The nets used in the products with a net backrest will be manufactured from a special material with a special netting technique.

GALA S0 21 VY

The chair will have a net backrest (Black Net), an upholstered seat, armrests (Standard: black and white), Four-leg metal frame (Black Epoxy Coated, Chromium Plated).

GALA S0 23 VY

The chair will have a net backrest (Black Net), an upholstered seat, armrests (Standard: black and white), Four-leg metal frame with casters (Black Epoxy Coated, Chromium Plated).

GALA S0 25 VY

The chair will have a net backrest (Black Net), an upholstered seat, armrests (Standard: black and white), C-Bent metal frame (Black Epoxy Coated, Chromium Plated).
